Chapter1 Exam Questions

1. Cloud Computing Deployment Models can be(multiple choices):
   - **A. Private cloud**
   - **B. Industry cloud**
   - C. Rapid cloud
   - **D. Public cloud**

2. Cloud computing is a model that enables users to obtain resources (such as computing, storage, network, applications, and services) from a shared, configurable resource pool anytime, anywhere. Resources can be quickly supplied and released, minimizing management workload and interactions among service providers.
   True

3. Cloud Computing Characteristics include(multiple choices):

   A. On-demand self-service
   B. Broad network access
   C. Rapid scalability
   D. Resource pooling

4. (Single Answer) An user rents VMs from a cloud service provider for daily use and returns them when traveling. Which of the following key characteristics of cloud computing does this reflect?

   A. On-demand self-service
   B. Location-independent resource pool
   C. Pay per use
   D. Elasticity

5. (Multiple Answer) Which of the following are cloud computing deployment modes?
   - A. Public cloud
   - B. Private cloud
   - C. E-Government Cloud
   - D. Hybrid cloud

6. (single choice) Which of the following statements about hybrid clouds is **incorrect**?

   A. They centrally manage enterprises' resources on both public and private clouds.
   B. They allow service applications to move seamlessly between public and private clouds.
   C. They leverage both public and private cloud advantages to optimize resource configuration.
   D. Applications can be deployed only on the public cloud

7. (T or F) Hybrid cloud is a deployment mode that integrates features of the public cloud and private cloud. The **industry cloud is a form of hybrid cloud**. **False**

8. (Single-Answer Question) Which of the following components does not belong to the FusionSphere virtualization suite?
   A. FusionCompute
   B. FusionManager
   C. OceanStor BCManager eBackup
   D. OpenStack

9. (Multi-Answer Question) Which of the following statements about Huawei FusionSphere virtualization suite are **false**?
   A. Huawei FusionSphere virtualization suite is an industry-leading virtualization solution, which significantly improves the data processing efficiency of data center infrastructure.
   B. Huawei FusionSphere is open-source compatible.
   C. Huawei FusionSphere is used only for the virtualization of compute, storage, and network resources on servers.
   D. Huawei FusionSphere can interconnect with third-party management platforms.

10. (Single Answer) Which of the following cloud service model deals with providing storage, network, servers and virtualization of resources?
    A. Software As A Service (SaaS).
    B. Platform As A Service (PaaS)
    C. Infrastructure As A Service (IaaS).
    D. Storage As A Service.

11. How long does it take to obtain an ECS?(single choice)

    A. Several seconds
    B. Several minutes
    C. Several hours
    D. Several days

12. Which of the following protocols requires certificates?(single choice)
    A. TCP
    B. UDP
    C. HTTP
    D. **HTTPS**

13. Cloud computing is a product of Internet and computing technologies development. Therefore, cloud computing is indispensable of network connections.
    True

14. Which of the following is true about the resource pooling feature of cloud computing?

    A. The resource pooling feature of cloud computing shields the differences between resources of the same type.
    B. The resource pooling feature of cloud computing allows CPUs and disks to be added to the same resource pool.
    C. The resource pooling feature of cloud computing is the prerequisite for the ubiquitous network access feature.
    D. The resource pooling feature of cloud computing depends on the virtualization technology.

15. The cloud services purchased by a user include an application **running environment,** but do not contain any application or related data. This mode is ( ).

A. IaaS
B. PaaS
C. SaaS
D. NaaS

16. Which of the following are true about the cloud computing deployment modes?

A. The private cloud is deployed on the premises of enterprises and used by internal employees.

B. The public cloud is generally constructed by carriers or cloud service providers. It sells or leases services to the public.

C. **The industry cloud generally have attributes of a certain industry, which is a "large private cloud" or "small public cloud".**

D. The hybrid cloud is generally constructed by carriers or cloud service providers. It integrates the features of the public cloud and private cloud. It sells or leases services to the public.

17. (Single）Which of the following is **true** about the on-demand self-service feature of cloud computing?

A. Users do not need to communicate with service providers at all when using cloud-computing resources.

B. After determining the required cloud computing services, users can apply for cloud computing resources by themselves.

C. The cloud computing service providers only need to prepare the cloud services and users will complete the remaining process all by themselves.

D. When using cloud-computing resources, users need to solve all problems by themselves.

18. (Single）There are many milestone events in the development of the Internet. Which of the following is true about the time sequence of the milestone events?

A. Establishment of the TCP/IP protocol ---> Birth of ARPANET ---> "www" officially open to the public ---> Birth of DNS

B. Birth of DNS ---> Establishment of the TCP/IP protocol ---> Birth of ARPANET ---> "www" officially open to the public

C. "www" officially open to the public ---> Birth of DNS ---> Establishment of the TCP/IP protocol ---> Birth of ARPANET

D. Birth of ARPANET ---> Establishment of the TCP/IP protocol ---> Birth of DNS ---> "www" officially open to the public

19. (multiple) Which of the following are **true** about the **ubiquitous network access** feature of cloud computing?

A. with network connection, users can access to cloud from different terminals

B. with network connection, users can access to cloud from different places.

C. with network connection, users can use cloud resources at any time.

D. with network connection, users can view cloud resource status at any time.

20. (T or F) the measurable service feature of cloud computing refers to charging based on time and usage. **False**

21. Which of the following is SaaS mode of Huawei cloud?
    - **A. Facial recognition**
    - B. ECS
    - C. EVS
    - D. OBS

22. Which of the following devices **cannot be** used to set a boundary between public and private cloud, in the hybrid cloud solution?

    - **A. Virtual switch**
    - **B. Core switch**
    - **C. Traffic cleaning device**
    - D. Firewall

23. Which is the difference between public and private cloud?
    - **A. Public cloud is open to public, but private used within specific users.**
    - B. Public has industry attribute but private does not.
    - C. Private has industry attribute but public does not.
    - D. Public cloud service need to be payed for but private is free services.

24. Which of the following **doesn't** reflect the self-service feature of cloud computing?
    - **A. The client receives an SMS notification before a month from service expiring.**
    - B. The client purchased a server by him/her self.
    - C. The client can install its own OS on the purchased cloud server such ECS.
    - D. The client purchased a server by him/her self.
